Question 1
Not yet answered
Points out of 6

What is the value of
(A) $\frac{31}{10}$
(B) $\frac{49}{15}$
(C) $\frac{33}{10}$
(D) $\frac{109}{33}$
(E) $\frac{15}{4}$
Select one:ABCDELeave blank (1.5 points)

Question 2
Not yet answered
Points out of 6

The sum of three numbers is 96 . The first number is 6 times the third number, and the third number is 40 less than the second number. What is the absolute value of the difference between the first and second numbers?
(A) 1
(B) 2
(C) 3
(D) 4
(E) 5

Select one:
ABE
Leave blank (1.5 points)

## Question 3

Not yet answered
Points out of 6
(A) $A$
(B) $B$
(C) $C$
(D) $D$
(E) $E$

Select one:
$\bigcirc \mathbf{A}$DLeave blank (1.5 points)

## Question 4

Not yet answered
Points out of 6

The least common multiple of a positive divisor $n$ and 18 is 180 , and the greatest common divisor of $n$ and 45 is 15 . What is the sum of the digits of $n$ ?
(A) 3
(B) 6
(C) 8
(D) 9
(E) 12

Select one:ABCDELeave blank (1.5 points)

Question 5
Not yet answered
Points out of 6

## Question 7

Not yet answered
Points out of 6
(A) 120
(B) 270
(C) 360
(D) 540

The infinite product

$$
\sqrt[3]{10} \cdot \sqrt[3]{\sqrt[3]{10}} \cdot \sqrt[3]{\sqrt[3]{\sqrt[3]{10}}} \cdots
$$

evaluates to a real number. What is that number?
(A) $\sqrt{10}$
(B) $\sqrt[3]{100}$
(C) $\sqrt[4]{1000}$
(D) 10
(E) $10 \sqrt[3]{10}$

Select one:ABCDELeave blank (1.5 points)

## Question 8

Not yet answered
Points out of 6

A rectangle is partitioned into 5 regions as shown. Each region is to be painted a solid color - red, orange, yellow, blue, or green - so that regions that touch are painted different colors, and colors can be used more than once. How many different colorings are possible?

A
B

A

## Question 9

Not yet answered
Points out of 6

## Question 10

Not yet answered
Points out of 6

On Halloween 31 children walked into the principal's office asking for candy. They can be classified into three types: Some always lie; some always tell the truth; and some alternately lie and tell the truth. The alternaters arbitrarily choose their first response, either a lie or the truth, but each subsequent statement has the opposite truth value from its predecessor. The principal asked everyone the same three questions in this order.
"Are you a truth-teller?" The principal gave a piece of candy to each of the 22 children who answered yes.
"Are you an alternater?" The principal gave a piece of candy to each of the 15 children who answered yes.
"Are you a liar?" The principal gave a piece of candy to each of the 9 children who answered yes.

How many pieces of candy in all did the principal give to the children who always tell the truth?
(A) 7
(B) 12
(C) 21
(D) 27
(E) 31

## Select one:

BLeave blank (1.5 points)How many ways are there to split the integers 1 through 14 into 7 pairs such that in each pair, the greater number is at least 2 times the lesser number?
(A) 108
(B) 120
(C) 126
(D) 132
(E) 144
